About Us

We provide a simple and user-friendly site to help you organize your finances so you do not have to wonder where your money is going. We're here to make finance organization, and calculations simpler for everyone.

Open the Portal to Better Finances

This innovative online platform is designed to help you manage your finances! Here, we offer free financial services crafted to empower individuals like you in making informed decisions about your money. Our user-friendly website features an interactive calculator, engineered to crunch numbers and provide personalized insights unique to your financial situation. But that's not all - we go beyond just calculations. Our platform provides statistical graphs to present your data in a visual manner. These graphs not only enhance your understanding of your financial environment but also allow you to identify patterns, trends, and areas for improvement. We understand the importance of privacy and security when it comes to handling sensitive financial information. Be certain, our website employs a personal account feature that will allow for your information to not only be secured but also saved for future reference. Whether you are a professional or an ordinary citizen with no experience, this website is structured to cater to individuals of all backgrounds. Join us today and embark on a journey towards financial empowerment.

Help

INPUT FIELDS:

The input fields, located within the month section, are where you may input the amount of money spent according to each category. A few of these input fields will not require user input as they will display the result of the calculations made according to specific categories, these input fields are the "Total Spent", "Gross Annual Income", and "Net Annual Income".

The categories such as "Rent", "Light", "Groceries", "Water", etc. is where you as the user will input the amount of your personal expense in that specific category. If some of the categories does not apply to your monthly expenses, then the input box may be left blank. If you wish to add a category that is not listed, then direct your attention to the button right under the categories that is labeled "Add Custom Input". Once this button is selected, then you will be able to label the input and type the amount for that input. Once all the categories that correspond to the user's expense, the amount of each category will be summed up and the summation will be displayed in the "Total Spent" field.

The input fields such as "Gross Monthly Income", "Net Monthly Income", and "Other Monthly Income" will be where you input your salary. The "Gross Monthly Income" and "Other Monthly Income" will be where you will input your pay check before the taxes are applied. For the "Net Monthly Income" you will input your salary amount after the taxes are applied. The values for the "Gross Monthly Income" and "Other Monthly Income" will be summed up and the total will be displayed in the "Gross Annual Income" field. The sum of "Net Monthly Income" and "Other Monthly Income" will be displayed in the "Net Annual Income" field.

Next to each of the input fields are some check boxes. These check boxes, when selected will copy the value inputted onto the next month. This feature is meant to make inputting values easier for the upcoming months, so if an amount is repetitive in various months, like certain bills, then you may select the check box next to the category and this specific value will be carried on to the upcoming month.

TABS:

The tabs located at the top of the page are there to help you navigate through the website with ease. The Home tab directs you to the main page where you may begin working on the calculations of your personal economic account.

The About tab will direct you to a page that will give you a description of the purpose and aim of this website.

The Contact tab directs you to a page that allows you to provide a statement of any problems you come across while using our website, simply provide us with your name, email and the problem you encountered in the input boxes and we will get back to you with a solution as soon as possible!

The Pie and Bar chart are tools that will demonstrate your expenses in a visual representation of your expenses.

Pie Chart:

The Pie chart will demonstrate the percentage of the amount you spend per monthly category according to your specific income.

Bar Graph:

The Bar graph will demonstrate the your total annual expenses according to each month

◇ Navigating the website

◇ Understanding how the finance tool works

- ❑ Inputting data
- ❑ Reading generated monthly pie chart and yearly bar graph

User Feedback (survey)

"I like the user interface the most, and I think what needs the most improvement is data being stored so users do not have to retype information"

April 5,2024

75% of surveyed individuals use a Bank app transaction tracker to track finances

"It's very modern and beautiful. Everything seemed intuitive and smooth."

April 20, 2024

I love the fact that it's gives accuracy and helps me track how much I spend in a month , It doesn't need [much] accuracy [on my part].

April 18,2024

"Make the font bigger and the boxes bigger."

April 24, 2024

Conclusion

Achievements

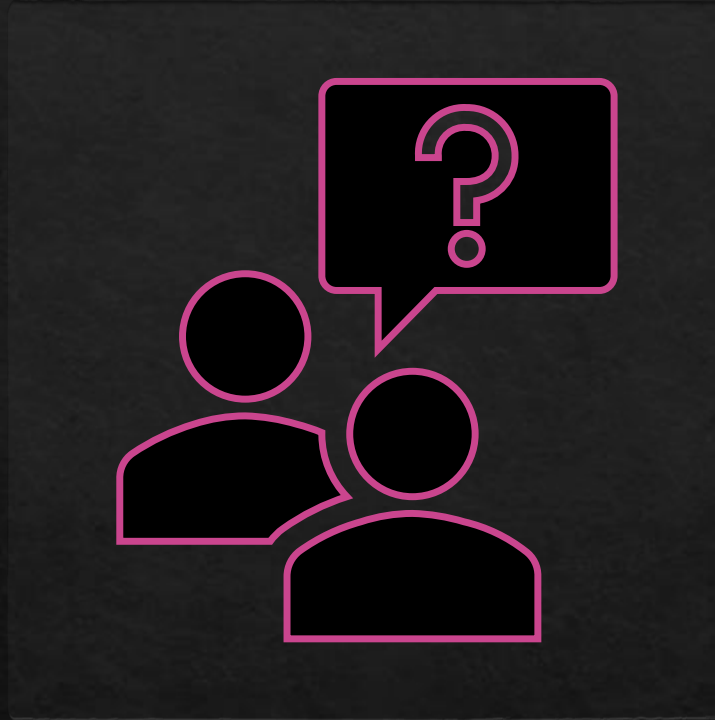

- ◆ User-friendly
- ◆ Free access
- ◆ Personal Profile

Future Improvements

- ◆ Successfully implement receipt scanner
- ◆ Amazon Web Services
